

EVAPORATED, CONDENSED AND DRY MILK
REPORT FOR JUNE 1962

ALBERT R. MANN
LIBRARY

AUG 1 1962

July 31, 1962

PRODUCTION

82
42
5A
EVAPORATED AND CONDENSED MILK: June production of evaporated whole milk is estimated at 215 million pounds by the Crop Reporting Board. This is 15 percent below June last year, 21 percent below the 1956-60 average for the month and the smallest June production since 1934. Production for the first half of 1962 totaled 1,003 million pounds, 15 percent below the corresponding period of 1961.

Output of canned sweetened condensed whole milk during June amounted to 6.8 million pounds, 20 percent above a year earlier, 23 percent above average and the largest June output since 1949. Production for the first 6 months of 1962 totaled 36.2 million pounds the same as the corresponding period of 1961.

DRY MILK: Production of total nonfat dry milk for human food (spray and roller process combined) during June is estimated by the Crop Reporting Board at 236.5 million pounds. This is 1 percent above June a year ago, 20 percent above the June 1956-60 average and the largest production of record for the month. Production for the first half of the year totaled 1,269.5 million pounds, 13 percent above the corresponding period of 1961.

June production of spray-dried nonfat milk was 222.5 million pounds, 4 percent above June last year, 27 percent above average and a record high production for the month. Production for the first 6 months of 1962 was 1,196.5 million pounds, 14 percent above the comparable period of 1961.

Roller-dried nonfat milk production totaled 14.0 million pounds for June. This is 27 percent below a year earlier, 38 percent below the June average and the smallest June production of record. Production for January through June was 73.0 million pounds, 6 percent below the corresponding period last year.

Dry whole milk production for June was 7.7 million pounds, 3 percent above June 1961, but 19 percent below the June 1956-60 average. Production for the first 6 months of 1962 totaled 44.9 million pounds, 10 percent above the comparable period of 1961.

NOTE: Attention is called to the revisions in production of dry milk, condensed and evaporated milk for 1962 based on enumerations for 1961 which are shown on pages 9 to 11. Revised prices paid for milk to be used in the production of evaporated or canned condensed milk for 1961 will be published in a later issue.

Dry buttermilk production for June is estimated at 9.2 million pounds, 2 percent below a year earlier, but 16 percent above the 5-year average. Production for the first 6 months of the year totaled 51.7 million pounds, 3 percent above the comparable period of 1961.

June production of dry skim milk for animal feed is estimated at 2.7 million pounds, 12 percent below June 1961 but 18 percent above average. During the first 6 months of 1962, production totaled 13.1 million pounds, 9 percent below the corresponding period a year ago.

STOCKS, SHIPMENTS PURCHASES, AND PRICES

EVAPORATED AND CONDENSED MILK: Stocks of evaporated whole held by reporting manufacturers on June 30 totaled 218.6 million pounds, 29 percent below a year earlier, 27 percent below the June 1956-60 average and the smallest holdings since 1945. Holdings of canned condensed whole milk at the end of June totaled 3.7 million pounds, 48 percent below June 30, 1961, and 51 percent below the 5-year average.

Prices paid producers by reporting condenseries during June averaged \$3.11 per hundredweight for milk testing 3.80 percent fat or an average of 82 cents per pound of milkfat. Price per pound of milkfat during June was unchanged from the previous month but was 5 cents below June last year. On the basis of milkfat, prices by States ranged from a high of 87 cents in Wisconsin to a low of 78 cents in Kentucky.

Manufacturers' selling prices of evaporated whole milk during June averaged \$6.03 per case of 48 14½-oz. cans. This is 4 cents below the previous month and 26 cents below June 1961. Compared with the preceding month, prices declined in all regions. New England, Middle Atlantic, East North Central and South Western Regions had declines of 5 cents, while all other area prices declined 3 cents per case.

Reporting condenseries for which historical data are available purchased 580 million pounds of milk from approximately 78,000 producers during June. Average daily purchases per producer were 248 pounds, up 7 percent from June 1961 and 29 percent above average.

DRY MILK: Total stocks of nonfat dry milk for human consumption held by reporting manufacturers on June 30 were 168.7 million pounds, 8 percent below a year earlier but 8 percent above the 1956-60 average for the date. Stocks of spray-dried nonfat milk totaled 156.0 million pounds, 5 percent below a year earlier but 16 percent above average. Roller-dried nonfat milk stocks totaled 12.7 million pounds, 32 percent below June a year ago, and 43 percent below the 5-year average. Holdings of dry whole milk on June 30 totaled 7.7 million pounds, 7 percent above a year earlier but 24 percent below average. Stocks of dry buttermilk on June 30 totaled 11.9 million pounds, 13 percent above June last year, 47 percent above average and the highest June holdings since 1953. Stocks of dry skim milk for animal feed were 1.7 million pounds, 5 percent below June a year ago but 18 percent above average.

Total shipments of nonfat dry milk for human food during June were 171.0 million pounds, 5 percent above both the previous month and June a year ago and also the highest June shipments of record. Total shipments of dry whole milk amounted to 6.1 million pounds, 18 percent below the previous month, but 17 percent above June a year ago. Shipments of dry buttermilk were 6.1 million pounds, 25 percent above the previous month, but 13 percent below June 1961. Shipments of dry skim milk for animal feed totaled 1.4 million pounds, 17 percent below the previous month but 34 percent above June last year.

Manufacturers' selling prices of nonfat dry milk for human food during June averaged 14.20 cents per pound, the same as the previous month but 1.6 cents below June a year ago. Spray-dried nonfat milk, at 14.30 cents, was fractionally lower than the previous month and 1.7 cents below June 1961. Roller-dried nonfat milk averaged 12.22 cents, compared with 12.27 cents the previous month and 13.71 cents for June 1961.

Selling prices of dry whole milk in all sizes of packages averaged 36.36 cents per pound, compared with 34.37 cents in May 1962 and 38.51 cents in June 1961. In 1-2 $\frac{1}{2}$ pound packages, dry whole milk averaged 46.74 cents per pound, 1.9 cents above the previous month but 1.4 cents below June a year ago. In 5-pound packages, dry whole milk averaged 40.00 cents per pound compared with 39.40 cents the previous month and 41.80 cents for June a year earlier. Dry whole milk in miscellaneous large packages (mostly barrels and drums) averaged 29.10 cents per pound, 0.3 cent above May 1962 but 2.2 cents below June 1961.

Manufacturers' selling prices of dry buttermilk for human food and animal feed combined averaged 11.79 cents per pound, compared with 12.0 cents the previous month and 13.54 cents in June last year. Dry buttermilk for human food averaged 12.38 cents per pound, 0.2 cent lower than the previous month and 2.2 cents below June a year ago. Dry buttermilk for animal feed averaged 9.88 cents per pound, down 0.1 cent from the previous month and 0.4 cent below June 1961.

Deliveries of nonfat dry milk to the United States Department of Agriculture during June were 156.4 million pounds. Total deliveries for the period April 1 through June 30, 1962 totaled 415.8 million pounds compared with 328.9 million pounds for the corresponding period of 1961. On July 25 the Department held 545.4 million pounds of uncommitted supplies of nonfat dry milk.

Growth Through Agricultural Progress

Table 10.-Milk bought by condenseries: Quantity bought, and number of producers, June 1962 ^{1/}

Item	Average June 1956-60	June 1961 ^{2/}	June 1962
Milk bought from producers pounds	628,677,000	631,417,000	580,259,000
Producers number	109,000	91,000	78,000
Average per producer per day pounds	192.3	231.3	248.0
Change in purchases per producer:			
1962 from 1961 percent	XXXX	XXXX	+ 7.2
1962 from 5-year average percent	XXXX	XXXX	+29.0

^{1/} Reported milk purchases at those plants (or their receiving stations) with canning equipment for which historical data are available. In some periods a part or all of the milk received at such plants may be used for purposes other than the manufacture of canned milk.

^{2/} Revised.
